Description

The new series of FT-313 LED rear lamps was created with trailer enthusiasts in mind.

It is undoubtedly distinguished by its interesting design and solid durability .

The design of the lamp creates an amazing impression of depth and three-dimensionality that immediately catches the eye

They impress not only with their attractive visual appearance, but also significantly improve visibility and influence road safety.

The FT-313 LED lamp is equipped with 3 functions
position, STOP, indicator

The products are available in two frame colors:

Lamps are recessed. However, it is possible to mount the lamps directly to the body using the FT-313/314 COVER body, available as an additional accessory.

The new series of products is available with a 1m cable or a Bayonet connector .

It has European approval and an electromagnetic compatibility certificate .

The products are completely waterproof – they have the high degree of protection – IP 69.

black — made of high-quality plastic

chrome — covered with a high-quality microporous nickel coating, ensuring corrosion resistance (PREMIUM version dedicated to the automotive industry).
