Rear lamp FT-313

Part no.: FT-313

Price on request

Fristom

Description

The new series of FT-313 LED rear lamps was created with trailer enthusiasts in mind.

It is undoubtedly distinguished by its interesting design and solid durability.

The design of the lamp creates an amazing impression of depth and three-dimensionality that immediately catches the eye.

They impress not only with their attractive visual appearance, but also significantly improve visibility and influence road safety.

The FT-313 LED lamp is equipped with 3 functions:
position, STOP, indicator.

The products are available in two frame colors:

Lamps are recessed. However, it is possible to mount the lamps directly to the body using the FT-313/314 COVER body, available as an additional accessory.

The new series of products is available with a 1m cable or a Bayonet connector.

It has European approval and an electromagnetic compatibility certificate.

The products are completely waterproof – they have the high degree of protection – IP 69.

black — made of high-quality plastic

chrome — covered with a high-quality microporous nickel coating, ensuring corrosion resistance (PREMIUM version dedicated to the automotive industry).
