Description

Series of modern interior LED type lamps in a round version have become widely used in energy-saving electrical installations and also in the widely understood automotive industry and households. The main features of this lamp include: low power consumption thereby maintaining light efficiency comparable with 35W halogen bulb; supply possibility with DC voltage and AC voltage – i.e. the possibility to supply with 230V AC voltage via a transformer. Due to its small size; shock resistance and easy installation but also due to its waterproofness the lamp is very appreciated in motorboat industry. The lamps are equipped with removable frame type housings. Standard version includes lamps with white, silver and gold frames. There is also a possibility to realize special orders for any housing color.

Specifications

Voltage	12 V
0,38 A	12 V: 0,14 A, 5 W · 36 V: 5 W
