Interior lamp FT-160

Part no.: FT-160

Price on request

Fristom

Description

Series of modern interior LED type lamps in a round version has become widely used in the energy-saving electrical installations and also in the widely understood automotive industry such as: cabin lights, load beds, horse trailers and caravans. The lamp has been also equipped with the switch light that enables the product to operate in two modes of intensity: I=25%; II=100%. The major advantages of the lamp are universal supply voltage and low power consumption that go with the high light emission. Due to its compact size, shock resistance, easy installation and waterproofness the lamp is very appreciated in motorboat industry. The lamps are available in two versions: black and white.
