Multifunctional rear lamp 2539 L W293

Part no.: 2539 L

Price on request

WAS

Description

New rear lamp series from WAS of completely new design. W293 has an integrated triangular reflector and is intended for trailers, semi-trailers, agricultural and slow-moving machines. The position light is a fully LED light with a neon-like glow: two parallel lines with arrow-shaped ends pointing to the centre; the standard version has an illuminated WAS logo in the centre, the NN version has none. Indicator (amber from a white lens) in the outer upper corner, reversing light (white) in the inner upper corner, stop light (red) in the outer lower corner, fog light (red) in the inner lower corner. Options: bottom licence plate light (suffix A), side marker SM1 (base code 2539), Super Seal connector with extra power outputs (4SS). Construction variants: bulb with red lens and optional LED module, LED with red lens and optional bulb function, or fully LED with transparent lens (black or white housing, static or dynamic indicator). Housing and lens are made of weather- and UV-resistant plastic. Fixed with two M8x24 screws, 152 mm apart. EMC approved.

Specifications
