Position lamp 2550 P SPOT W297.3.1

Part no.: 2550 P SPOT

Price on request

WAS

Description

New series of position lamps from WAS in five shape variants: W297.1 long housing and long lens, W297.2 medium housing and long lens, W297.3 short housing, W297.4 medium housing and short lens, W297.5 long housing and short lens. All W297.x.1 lamps have front, rear and side position lights. W297.x.3 versions add a side direction indicator. The optional SPOT version projects a precisely directed spot of light on the ground to help with manoeuvring in poor visibility. Housing and lens are made of a polymer blend chosen for durability and flexibility over a wide temperature range; the lens material was tested in the manufacturer's own laboratory and the electronics passed EMC tests. LED light source, 12 V and 24 V, IP6K9K, left and right versions. 40 cm lead, or FLRYY11Y 2 x 1.0 mm2 cable in the -Jxx versions.

Specifications

Light source	**LED**
