Rear lamp FT-270

Part no.: FT-270

Price on request

Fristom

Description

The FT-270 LED rear lamp series has been designed with attention to every detail. It features 5 or 6 functions (+ licence plate illumination). It is available with a 1 m cable or a Bayonet connector .

It has E9 European type approval and an EMC (Electromagnetic Compatibility) certificate.

The product is also equipped with reverse polarity protection.

The lamp construction is resistant to shocks and mechanical damage.

Robust construction with an IP68 rating – ensures complete dust protection and a high level of water resistance.

FT-270 LED lamps can be used in all types of trailers, semi-trailers, agricultural and construction machinery and equipment, as well as in all vehicles that are required to be equipped with a triangular reflector.

The FT-270 LED O BAJONET lamp variant features a built-in light load module (CANBUS system). The integrated load module – CANBUS system – ensures excellent communication between the vehicle and the trailer or semi-trailer.

It eliminates the risk of error messages appearing on the vehicle's dashboard. Thanks to lamps equipped with the CANBUS monitoring system, the vehicle's onboard computer will not display warnings such as a burnt-out bulb.

Specifications

Voltage	12 V
Functions	5
Protection rating	IP68
Cable length	1 m
version without license plate light	rear running light + number plate light: 0,05 A · 0,1 A: 0,6 W
STOP light	rear running light + number plate light: 0,2 A · 0,1 A: 2,4 W
indicator	rear running light + number plate light: 0,2 A · 0,1 A: 2,4 W
reversing light (depending on the version)	rear running light + number plate light: 0,2 A · 0,1 A: 2,4 W

fog light (depending on the version)

rear running light + number plate light: 0,2 A · 0,1 A: 2,4 W
